SUMMARY EVIDENCE REPORT

This report is in two parts, Part 1, Background and Process, and Part 2. This is Part 1.

Part 2 is a list of separate Appendices, that together make up the Base Evidence, that has informed the Neighbourhood Development Plan.

Purpose

Planning policy and proposals need to be based on a proper understanding of the place they relate to, if they are to be relevant, realistic and address local issues effectively. It is important that the Neighbourhood Plan is based on robust information and analysis of the local area; this is called the 'evidence base'. Unless policy is based on firm evidence and proper community engagement, then it is more likely to reflect the assumptions and prejudices of those writing it than to reflect the needs of the wider area and community.

We are advised that the evidence base needs to be proportionate to the size of the neighbourhood area and scope and detail of the Neighbourhood Plan. Other factors such as the status of the current and emerging Local Plan policies will influence the depth and breadth of evidence needed. It is important to remember that the evidence base needs to reflect the fact that the plan being produced here will have statutory status and be used to decide planning applications in the neighbourhood area.

It is necessary to develop a clear understanding of the neighbourhood area and policy issues covered;

This report extracts and presents from the evidence gathered that which we believe may be most relevant to the preparation of a Neighbourhood Plan

The Hindon Neighbourhood Development Plan is built upon evidence from two main sources: external (material produced by others such as Wiltshire Council) and internal (material that applies specifically to Hindon, including locally-generated material).
